

HW19:

1.

```
/**
 * Generates the set of characters in the given {@code String} into the
 * given {@code Set}.
 *
 * @param str
 *           the given {@code String}
 * @param charSet
 *           the {@code Set} to be replaced
 * @replaces charSet
 * @ensures charSet = entries(str)
 */
private static void generateElements(String str, Set<Character> charSet) {
    charset.clear();
    for(int I =0; I <str.length(); i++){
        char ch = str.charAt(i);
        if(!charSet.contains(ch){
            charset.add(ch);
        }
    }
}
```

2.

```
private static String nextWordOrSeparator(String text, int position,
        Set<Character> separators) {
    Boolean isSep = separators.contains(text.charAt(position));
    Int end = position;
    While(end < text.length() && separators.contains(text.charAt(end)) ==
isSep){
        End++;
    }
    Return text.substring(position, end);
}
```
