

HW20

1.

```
/**
 * Reverses ("flips") {@code this}.
 *
 * @updates this
 * @ensures this = rev(#this)
 */
public void flip();{
    Stack<T> temp = new Stack1L<>();
    While(!this.isEmpty()){
        Temp.push(this.pop());
    }
    This.transferFrom(temp);
}
```

2.

```
/**
 * Reverses ("flips") {@code this}.
 *
 * @updates this
 * @ensures this = rev(#this)
 */
public void flip(){
    int left = 0;
    int right = this.length() -1;
    while( left < right){
        T temp = this.entry(left);
        This.replaceEntry(left, this.entry(right));
        This.replaceEntry(right, temp);
        Left++;
        Right--;
    }
}
```

3.

```
/**
 * Reverses ("flips") {@code this}.
 *
 * @updates this
 * @ensures this = rev(#this)
 */
public void flip(int left, int right){
```

```
    if (left > right){  
        return;  
    }  
    T temp = this.entry(left);  
    This.replaceEntry(left, this.entry(right));  
    This.replaceEntry(right, temp);  
  
    Flip(left + 1, right + 1);  
}
```
